

CORNER BEAD - M

Corner Bead for Mortar

CORNER BEAD-M, designed for the use on exterior wall corners. Manufactured from PVC, CORNER BEAD-M is durable, lightweight, and relatively easy to cut to appropriate size. CORNER BEAD-M comes with a high hole count throughout the entire length, which offers excellent mortar adhesion. The two different types of CORNER BEAD-M provide our customers with the ability to create perfectly square or round corners. It is the perfect solution for any construction project that requires perfectly straight and strong, right, or round corners. High quality materials and strict quality control, used in the manufacturing of the product, ensure longevity and reliability our customers can depend on. Meticulously designed and tested to meet the rules and regulations, and the high expectations of the international market.
