Installation drawing

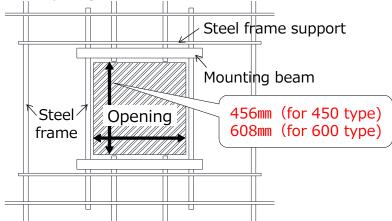

●Installation (450, 600 type)

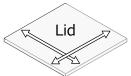

1 Install the steel frame base, and create an opening in the ceiling material

- \cdot Mount the base (be sure to preserve the opening's integrity)
- •Create an opening for the outer frame

3 Secure the lid to the inner frame

- ·Lid thickness: Up to 25mm
- •Cut the lid to fit the inner frame (Refer below)

Product	Thickness	450 type	600 type
Lid dimensions	Less than 15mm	417mm	569mm
	More than 15mm	415mm	567mm

·Insert the board into the inner frame and secure the lid with board retainers

More than 15mm

*The direction of retainers will change depending on the thickness of the board

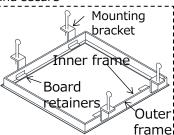

Screw Board retainers (Upturn)

Inner Lid Less than 15mm
frame

Board retainers (Downturn)

Lid

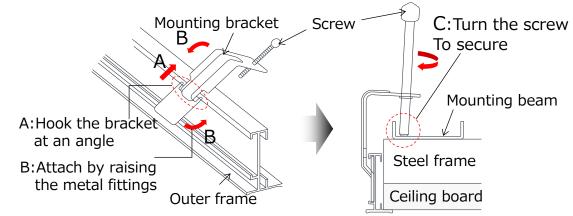

Line up the mounting brackets and board retainers facing each, and secure

Attach the outer frame to the mounting base (Lightweight steel base)

Version: 20241112

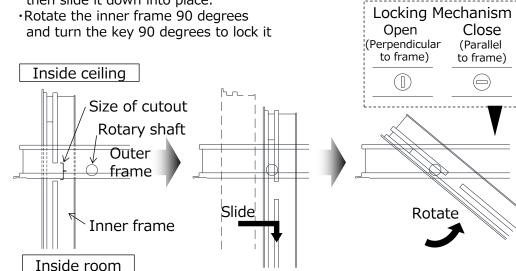

- •Fit the outer frame into the opening
- ·Attach the mounting bracket to the outer frame (A, B)
- •Turn the screw to secure it to the support beam(C)

(4)Attach the inner frame to the outer frame

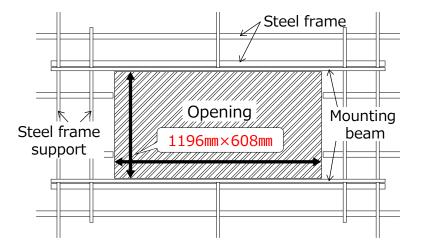

·Insert the inner frame into the outer frame

•Slide the inner frame onto the rotary shaft through the inner frame's cutout, then slide it down into place.

●Installation (1200×600 type)

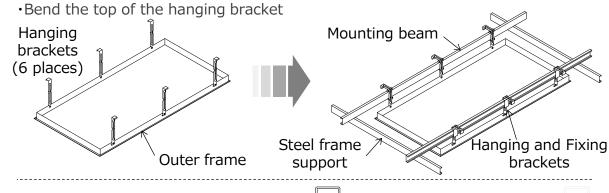

- 1) Install the steel frame base, and create an opening in the ceiling material
- $\cdot \text{Mount the base (be sure to preserve the opening's integrity)}$
- ·Create an opening for the outer frame

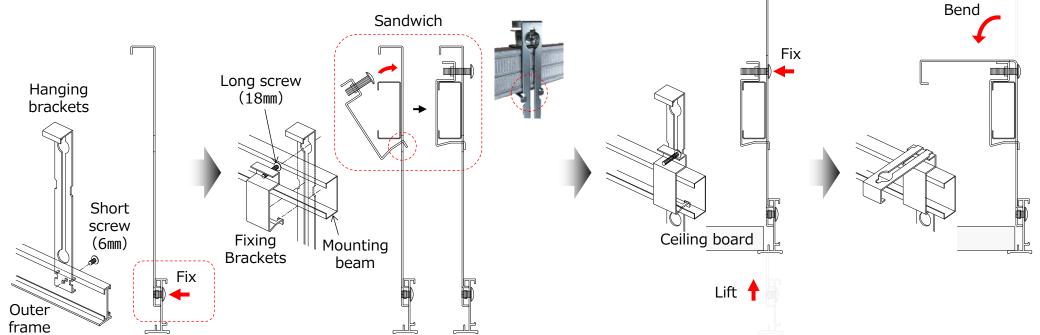

Attach the outer frame to the mounting base (Lightweight steel base)

\$ FUKUVI

- •Fix six hanging brackets to the outer frame with short screws, and then fit them into the opening
- •After attaching the long screw to the fixing bracket, sandwich the mounting beam between hanging brackets and fixing brackets
- ·Lift the outer frame, align it to the ceiling, and then secure it with long screws

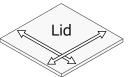

Locking Mechanism

Close

Open

Secure the lid to the inner frame

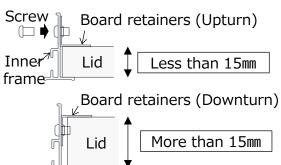

- ·Lid thickness: Up to 25mm
- ·Cut the lid to fit the inner frame (Refer below)

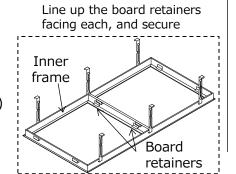

Product	Thickness	1200×600 type
Lid dimensions	Less than 15mm	569mm
	More than 15mm	567mm

·Insert the board into the inner frame and secure the lid with board retainers *The direction of retainers will change

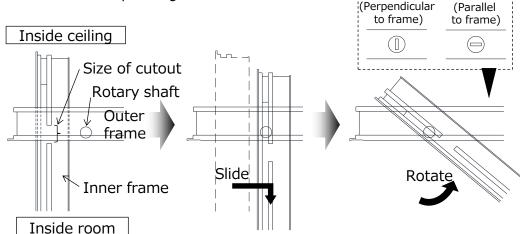

depending on the thickness of the board

Attach the inner frame to the outer frame

- ·Insert the inner frame into the outer frame
- •Slide the inner frame onto the rotary shaft through the inner frame's cutout, then slide it down into place.
- ·Rotate the inner frame 90 degrees and turn the key 90 degrees to lock it

- After installation or during inspection, do not stand on the frame. Standing on it will damage the frame.
- When opening the lid, for safety, support it with your hand. If not supported, the lid will open with force, creating a dangerous situation.
